

## **ADR REQUIREMENTS**

**Please record the select takes to a time coded Pro-Tools 6x or Higher session. 48k, 24 bit, Broadcast .wav. Match timecode rate to picture.**

**If you do a DAT Backup, please do not send it, just keep it for a backup**

**Please ID each take w/character name, cue # and take # in the Pro-Tools session.**

**If any of the specs or additional work requested are going to require additional charges above \$100.00, please contact us.**

**Please upload session to our ftp site. Contact us for login info.**

## **If Using Source Connect**

**Our Source Connect Username is 'smartpost'**

**You can either send time code on Channel 2, or use "Rewire" and Remote Transport Sync (RTS). Please make sure you have a static IP on the computer you are using and are forwarding ports 6000-6002 from your router to it. We set our data rate at 192kbs**

## **If using ISDN**

**We use 2 channels from you, Left for Voice, Right for time code. Our talkback will come to you on the left return channel.**

**Thanks,**

**Smart Post Sound**
