Time Code Window Burn in Upper Right
Also Separate .wav Guide track files (Dialog, FX, Music)

Mix Stage Picture

HD Quicktime for dub stage, Codec DNX36 1080p
Time Code Window Burn in Upper Right

EDL:

The EDL should be in File32 or CMX3600 (This one is limited to only 999 events though) format e-mailed to eds@smartpostsound.com. It may also be included on any drive or folder that is delivered with other turnover materials. Most systems provide a correctly formatted edl currently.

The EDL needs to be for Audio only, include scene/take, and with sound roll number as the Roll ID type. Please export 3 EDLS, (Sound Timecode, Start TC, and AUX TC sources). The sound roll number should reflect the production rolls of the dailies, Or Shoot date is also acceptable.

Please uncheck the box "Dissolves as Cuts" when applicable

Please export 1 Video only edl as well, V1.edl.

If there are Recaps in the series please over-cut the recaps with a video source like CCM, VAM, or DnxHD, etc.. This will provide the episode number and the Master Source timecodes. Please export this recap edl separately.

AAF and Production Sound Dailies

Export using Embed Sequence with media. At least 240 frame handles. AIF or Wave Audio format (Preferred). Please include ALL audio tracks in the AAF outputs. Video track is not required here as we will receive the Video separately in the Quicktime format from the specs above.

Please send All Master Production Sound Roll Dailies.

Documentation (Digital Preferred)

We ask for a copy of the Lined script as well as all sound reports and telecine logs (If applicable).

Please send all Hard Drives to: 405 Riverside Drive, Burbank, CA

We can also receive sound dailies and turnovers Digital via Media Shuttle, Aspera, Our Client FTP (please ask for login credentials), and most other Digital Delivery methods. Check with us if you are unsure.
